Checklist for Formative Evaluation of Presentation

Required criteria – groups must demonstrate all three:

1. The sun warms liquids and solids on the earth, and then the heat rises from those objects warming the air.
2. The earth's surface does not heat evenly; it depends on the angle of the sun's rays as they strike the surface.
3. The air temperatures on the earth are often highest in the afternoon.

(Check mark if presented)

Student Names/Numbers	Criteria 1	Criteria 2	Criteria 3
