

## Virus Report Requirements

Choose three diseases that are caused by viruses. You will need to answer each of the questions below for each of the diseases in your presentation:

1. How is the disease transmitted to humans, animals, or plants?
2. What are the symptoms of the disease?
3. Can the disease symptoms be treated?
4. Is there an immunization or cure for the disease?

Your presentation visual (whether it's a poster, overhead transparencies, computer presentation, or mobile) should include a title and the name of each disease along with its specific corresponding information in either a paragraph answering the questions or individual "bullet" sentences restating the questions with your answers.

Ex: \* The symptoms of this disease are when the leaves of the plant begin to show yellow blotches and begin to wither.

## Criteria Rubric

	Needs Improvement	Average	Proficient	Excellent
Content Knowledge (SC.G.1.3.1.7.3 and Goal 3 Standard 1)	Student does not have grasp of information; student did not answer required questions for each disease.	Student is uncomfortable with information and answered only a few of the required questions for each disease.	Student is at ease with content and answered all required questions for each disease.	Student demonstrated full knowledge (more than required) with explanations and elaborations for each disease.
Presentation (Goal 3 Standard 2)	Student mumbles, is difficult to understand, and speaks too quietly for everyone to hear.	Student uses incomplete sentences and audience members have a hard time hearing.	Student's voice is clear and confident.	Student used a clear voice with appropriate tone variation. Is interesting and vivid.
